

# What You Put In Your Recycling Cart or Drop Off Bin Does Matter

What you put into your hauler's collection cart or into a drop bin can have a significant impact. When you have an item that you're not sure about, it is easy to just throw it into your recycling. These items that are not accepted could be contaminating other recyclables, causing possible harm to workers handling the materials, damaging equipment, adding additional costs, and adding the waste stream.

Single stream recycling is a success. We have watched the amount of recycling go up dramatically. Please make sure the items you are placing in your recycling cart are accepted. If you have questions, please check with your garbage hauler or you are welcome to call us 605-336-1744 or email us your questions. [info@millenniumrecycling.com](mailto:info@millenniumrecycling.com). Thank you!

## Examples of Items **NOT** allowed in your Single Stream:

 <p>04/23/2009</p>	<p><b>Toys:</b> toys contain multiple types of plastics as well as metal parts. They are not recyclable in our single stream process</p>
 <p>04/23/2009</p>	<p><b>Fuel or pressurized tanks:</b> tanks cause harm due to pressure causing explosions, fire, and spraying of hazardous fuels and corrosives</p>
 <p>04/24/2009</p> <p>04/23/2009</p>	<p><b>Scrap Metal, Metal Parts:</b> These items create additional handling and potentially damage equipment</p>
 <p>07/09/2010</p>	<p><b>Rocks, Dirt, Gravel, Debris:</b> cause damage to equipment as well as contaminating other materials.</p>

**Large plastic products, vinyl or aluminum siding:** Add extra handling and contaminates

**Electronics:** We recycle separately

**Appliances:** Check your area for recycling options

**Hoses, Cords, Twine, Extension Cords:** Wrap around equipment and cause down time
